This release contains extended abstracts for keynote presentations, talks and posters presented at the 11th International Platinum Symposium held in Sudbury, Ontario, June 21 to 24, 2010. The talks and posters presented at this conference cover a range of topics related to the theme "PGE in the 21st Century: Innovations in Understanding their Origin and Applications to Mineral Exploration and Beneficiation". The aim of the conference was to examine ways to make exploration efforts more efficient, to identify problems that need to be addressed, and to ensure that current expertise is passed along to the new generation. The technical sessions focused on the geochemistry of chalcophile and highly siderophile elements, the geology and genesis of platinum group element (PGE) and Ni-Cu-(PGE) deposits, and the mineralogy, metallurgy and beneficiation of PGE ores. The abstracts of the talks and posters presented at this symposium will be of interest to ore deposit geologists, exploration geologists, mineralogists, geochemists and metallurgists. The abstracts are in portable document format (.pdf).

The Intended Use and Purpose for Collecting the Data Set or Information Holding: The objective of this product is to collect and disseminate geoscience information for Ontario.
